OBJECTIVE

Senior Software Engineer (SDET) with 7 years of experience in API testing, UI testing, and automation. Skilled in Java, REST Assured, Selenium, and Playwright. Experienced in prompt engineering and AI-assisted testing.

EXPERIENCE

SENIOR SOFTWARE ENGINEER - WIPRO LTD. BANGALORE (APRIL 2023 – PRESENT)

RADAR - (API TESTING, DEFECT & PROJECT MANAGEMENT)

- Performed API testing and automation using REST Assured in Java.
- Used Radar for defect tracking, validation, and lifecycle management.
- Managed project workflows including task tracking, test progress, and sprint activities.
- Executed regression testing to validate fixes before release.
- Participated in bug triage and release discussions with development teams.
- Maintained traceability between test cases, bugs, and requirements.
- Leveraged Claude Code and Gemini for AI-assisted test case generation, automation refactoring, test coverage analysis, and faster test plan creation.

PROJECT – MARKETING PREFERENCE MANAGER (UI & API TESTING)

- Developed and maintained UI/API test frameworks using Playwright and REST Assured (Java).
- Deployed builds in the QE environment using Spinnaker.
- Performed regression testing, test new features manually, and integrated them into the suite.
- Authored test cases in Radar, raised bug reports, and collaborated with teams for triage.
- Created UAT and PVT test accounts, automated cases and created Jenkins jobs for the same.
- Use different test strategies to draft test cases to get maximum coverage.

PROJECT – PHONE SERVICE, EVS, UNDEL, GEO, IDMRQ (API TESTING)

- Migrated test cases from a keyword-driven framework to a REST-based, data-driven framework.
- Executed manual test cases using Postman and assessed their suitability for automation.
- Added new test cases to the automation suite.
- Contributed to pipeline migration efforts and debugged host-side errors

TEST ENGINEER - MARZER TECHNOLOGIES, BANGALORE (MAY 2018 - FEB 2023)

PROJECT – POSHY (E-COMMERCE WEB APPLICATION)

- Analysed business, functional, and technical specifications to draft effective test plans.
- Developed UI automation framework using Java and Selenium for web application testing.
- Automated new test cases and maintained a comprehensive regression test suite.
- Actively participated in Agile ceremonies and collaborated with teams for defect triage.
- Utilized a data-driven framework with Excel and TestNG Data Provider to manage test data.
- Scheduled Jenkins jobs and reviewed reports to identify failing modules to help fix bugs.

SKILLS

Build & Development

- Maven
- Git
- GitHub
- IntelliJ

Language & Automation

- Java
- Selenium
- Playwright
- REST Assured

Test Management & Monitoring

- Jira
- Radar
- Splunk
- Allure

CI/CD & DevOps

- Jenkins
- Rio
- Spinnaker
- GitHub Actions

API & Functional Testing

- Postman
- Hoppscotch

AI-Assisted Testing

- Claude Code
- Gemini

EDUCATION

B.E: Srinivas School of Engineering, Mukka Mangalore
Year: 2017

QA Engineer, Software Test Engineer, Manual Testing, Automation Testing, Functional Testing, Integration Testing, System Testing, Regression Testing, Testing, Smoke Testing, Sanity Testing, Test Case Design, Test Scenario Creation, Test Planning, Defect Tracking, Bug Life Cycle, Jira, Selenium WebDriver, Java, TestNG, Maven, Page Object Model, Hybrid Framework, API Testing, Postman, REST API, XPath, Locator Strategy, Handling Popups, Frames, Alerts, Mouse Actions, Keyboard Actions, Screenshot, Rule Engine, SDC, SDC, Core Java, OOP Concepts, Exception Handling, SQL Queries, Excel Testing, Apache Poi, Eclipse IDE, Git, Jenkins, SonarQube, Jmeter, JUnit
